

This is my complete wood labyrinth layout. To use it, print out pages 2 and 3 at full size, then hold them against a window to align and tape them together. The actual size of my labyrinth surface is 11" x 11". The inside square is 10.75" square, allowing for the wood set into the frame dados.

You'll have to play around with it to get it how you want it. Set up all the little fences without glue first to make sure it looks right.

Enjoy!
